ABSTRACT OF THE DISCLOSURE

5 An electrically controlled braking system including an
electrically controlled brake for braking a vehicle wheel,
an electric power source device, a brake control apparatus
for controlling an electric energy to be supplied from the
electric power source device to the brake, for thereby
controlling an operation of the brake, when a brake
operating member is operated, and a switching device
disposed between the electric power source device and the
10 brake control apparatus, and wherein the switching device is
turned on for connecting the electric power source device to
the brake control apparatus, in response to an operation of
the brake operating member.
